GEOLOGICAL AND MINERAL MAP OF UTTAR PRADESH

FIRST EDITION-1973

Scale 1 : 2,250,000

Kilometres 50 25 0 50 Kilometres

Miles 25 0 25 Miles

Topographical features

- Boundary, international
- Boundary, state
- Boundary, district
- Headquarters of state
- Headquarters of district
- Railway line
- Reservoir
- River

INDEX (MINERAL)

- Andalusite
- Antimony
- Bauxite
- Clays
- Coal
- Copper Ore
- Dolomite
- Gypsum
- Iron Ore
- Lead Ore
- Limestone
- Magnesite
- Pyrophyllite and Diaspore
- Phosphorite
- Quartz, Silica sand
- Talc

INDEX (GEOLOGY)

Alluvium, Dun gravel	RECENT	
Siwalik System	MIO-PLEISTOCENE	
Granites of Himalaya	? TERTIARY	
Subathu Group/Nummulitic Limestone	EOCENE	
Deccan Trap	CRETACEOUS-EOCENE	
Cretaceous Formations	CRETACEOUS	
Spiti Shales/Tal Series	JURASSIC	
Triassic Group	TRIASSIC	
Productus Shales/Krol Series/Blaini Series/Mandhali Group/Lower Gondwana System	CARBONIFEROUS-PERMIAN	
Muth Series/Nagthat Group (with volcanics)	? DEVONIAN	
Garbyang Group, Ralam Formation	CAMBRIAN	
Haimanta Group, Chandpur Group	UPPER PROTEROZOIC-LOWER PALAEOZOIC	
Martoli Group, Simla Group(S), Deoban Group(D), Garhwal Group, Vindhyan Group(with volcanics)	UPPER PROTEROZOIC	
Central Himalayan Gneisses (with granites, schists, quartzites etc.), Almora - Ramgarh Crystalline Group and Unclassified Gneisses of Peninsula	? MIDDLE PROTEROZOIC	
Bijawar Group and equivalents	LOWER PROTEROZOIC	
Bundelkhand Granite Gneiss	ARCHAEAN	
Faults, Thrusts		

Projection : Modified Secant Conical
